

When the customer has placed an order, **your job is done.**

Axla is your partner for seamless e-commerce logistics

Axla Logistics is the leading expert in e-commerce logistics. We provide the best 3PL experience in the market for online retailers operating in Finland.

At Axla, innovation meets responsibility.

A large, modern, dark-colored industrial building with a glass facade, identified as an Axla Logistics facility. The building has the 'Axla LOGISTICS' logo on its side. In the foreground, there is a paved road with various traffic signs, including a pedestrian crossing sign and a blue sign with a white 'A' symbol. The sky is blue with some clouds. The bottom of the image features a teal and cyan geometric graphic overlay.

Axla[®]

Our service covers all stages of logistics

1. Goods reception:

We efficiently handle the receipt and inspection of your products.

2. Storage:

We provide professional warehousing services that ensure your goods are stored under optimal conditions and are easy to manage.

3. Picking:

Our fast and accurate picking process guarantees the efficient fulfillment of your orders.

4. Order deliveries:

We pack your customers' orders manually or automatically and ship them worldwide through our partners.

5. Returns handling:

We also take care of customer returns.

The logo for Axlaxia Logistics is displayed in large, 3D, white letters on a teal-colored building facade. The word 'Axlaxia' is positioned above 'LOGISTICS', and both are slanted upwards to the right. The letters have a slight shadow, giving them a three-dimensional appearance. The background shows a blurred view of a city street with buildings.

Axla Logistics is committed to sustainability and responsibility

Success in the logistics industry of the future requires attention to environmental impacts, social responsibility, and transparent management practices.

Consumers expect companies to act responsibly, and we want to meet those expectations.

A new automated **logistics center** in **Tuusula**

The AutoStore warehouse automation, combined with Axla's warehouse management system and customer applications, delivers unprecedented efficiency for e-commerce logistics in Finland. Sustainability is at the heart of our new distribution center, built with extra care using the BREEAM New Construction model.

This is Finland's first building to achieve the highest possible "Outstanding" level under the version 6 classification. The property emphasizes energy efficiency, including the use of solar panels, and its central location enables fast and carbon-neutral last-mile deliveries.

**Finland's first building
with the highest possible
Outstanding-level rating**

A complete ecosystem for optimized e-commerce logistics

To make the most of outsourcing your e-commerce logistics, we integrate your systems with our warehouse management system. Our system has ready-made interfaces for most e-commerce and delivery management platforms.

These integrations reduce manual work, speed up processing times, and minimize human error. **Integration is quick and easy.**

Axla[®]
